ADVANTAGE VSR

Item	Heat treatment	VSR
Stress relief	40-80%	50-95%
Energy consumption	Expensive	Energy-saving 95% compared with heat treatment
Environmental	Flue gas dust waste residue	No pollution
Dimensional stability (tension performance)	Good	More than 60% increase compared with heat treatment
Cost	USD30-60/ per ton	USD0.5-1.5/ per ton
Cycle	10-45h	Within 1 hour
Resistance to deformation	Reduced than before	50-80% increase compared with heat treatment
Deformation	Large	Negligible
Oxidation	Yes	No
Large workpiece	No way	Easy

Bukit Kemuning, Seksyen 32
40460 Shah Alam, Selangor Darul Ehsan, Malaysia

In compliance with Regulation 305/2011/EU of the European Parliament and of the Council of 9 March 2011 (the Construction Products Regulation or CPR), this certificate applies to the construction product:

Manufacturing of Steel Structures and Assembly for the use in all types of construction works (Excluding Design Responsibility)

This certificate attests that all provisions concerning the assessment and verification of constancy of performance and the performances described in Annex ZA of the standard(s)

EN1090-1:2009+A1: 2011- Execution of steel structures and aluminium structures – Part 1: Requirements for conformity assessment of structural components

under system 2+ are applied and that the factory production controls fulfil all the prescribed requirements set out above.

The attached Schedule, of the same date, details the manufacturing location(s), harmonised product standard and product parameters and shall form a part of this certificate.

This Certificate will remain valid as long as the test methods and/or factory production control requirements included in the harmonised standard, used to assess the performance of the declared characteristics, do not change, and the product, and the manufacturing conditions in the plant are not modified significantly.
